

Correction to 'Integrating transcriptomics and proteomics to assess antisense oligonucleotide safety and efficacy: a time-resolved approach'

This is a correction to: Daniel van Leeuwen, Miriam Cipullo, Eleanor C Williams, Anthony Iannetta, Britney Chu, Junmin Wang, Ghaith Hamza, Danang Crysnanto, Nicola Guzzi, Jennifer Y Tan, Eric Miele, Ritwick Sawarkar, Irina Mohorianu, Sebastian Prill, Patrik Andersson, Integrating transcriptomics and proteomics to assess antisense oligonucleotide safety and efficacy: a time-resolved approach, *NAR Molecular Medicine*, Volume 3, Issue 2, April 2026, ugag016, <https://doi.org/10.1093/narmme/ugag016>

A figure layout error has been corrected in Figure 2D. During production steps, the numbers of differently expressed genes/proteins in the middle of the circles were wrongly positioned, and "216" disappeared from the green circle for ASO LNA43. Figure 2 is emended in the article.
